## Data sheet | Dosing system

Version 03/2025

### KH 500 CONVEYOR BELT

#### TECHNICAL SPECIFICATIONS

Dosing capacity	up to 50 kg/min
Conveying speed	35 m/min
Frequency	50 Hz
Connection alternating current	240 V/ 50 Hz

#### WEIGHT

Total weight	650 kg
--------------	--------

#### DIMENSIONS (TRANSPORT CONDITION)

Lenght	7,20m
Width	1,80 m
Height	1,36 m
Rear overhang	4,12 m

Subject to change without notice. All specifications are only a general description of our products.

#### INFO

- › The KrampeHarex KH 500 conveyor belt is a high-performance dosing device for problem-free dosing of steel and plastic macro fibres.
- › A continuous mass flow avoids surge dosing and thus the so-called steel fibre hedgehogs.
- › Even difficult fibre geometries can be dosed.
- › The conveyor belt can be moved flexibly in the ready-mix concrete plant or on construction sites thanks to its tyres.
